

DEAR FRIENDS & SUPPORTERS,

A message from the Founder and President;

“Not everyone can be famous but everyone can be great because greatness is defined by service.” M. L. King, Jr.

When I founded LEAP Forward, Inc., my intentions were to help youth to make better life, education, and career choices. I witness so many youth not taking advantage of their God-given talents and gifts they possess inside. I believe that, if I expose youth to education and career opportunities, they would dream... then dream bigger dreams... and, ultimately, aspire to reach their dreams.

However, the fact is that our youth are suffering. They have so many giants to tackle. Such giants include violence, drugs, economic challenges, low self esteem, discrimination, teen parenthood, and lack of access to positive activities and opportunities; just to name a few. And yet, if they fail, then we all fail

because we didn't care enough to be a part of "The Village" necessary to see them through.

To those who dared to make a difference, I thank you for your time, effort and financial support. To those looking to get involved, take a look at LEAP Forward and measure us by our accomplishments. We can't reach everybody but we can help somebody – even if it's just ONE.

Who knows if that ONE may be the ONE to save the world with a cure for AIDS or to develop a slamming technological device that makes life easier for all of us...

I believe in our youth. I believe in their journey and will continue to guide them to better lives that contribute to society.

Thank you ALL for your belief in our journey!
Rhonda Thomas

Thank You 2006 Scholarship Contributors for helping to fulfill the dreams of our youth!

Scholarship Campaign 2007

Dear Friends and Supporters,

Launching Educational Assistance Program Forward, Inc (LEAP Forward) is a recognized 501(c) 3 nonprofit organization. The purpose of our organization is to introduce our youth to math, engineering and science careers. We also encourage academic excellence.

Since 2001, LEAP Forward has conducted college tours, awarded over 40 book scholarships, participated in Mathematics Engineering Science Achievement (MESA) Programs, exposed youth to engineering camps and conferences and assisted youth with college admissions applications and financial aid documentation.

Additionally, we assisted youth with resume preparations and employment searches. See page 7!

"LEAP Forward, Inc. needs your support in helping 10 deserving students by awarding them \$500 Book Scholarships this coming academic year."

We want to continue our efforts in 2007. We need your help so that we can continue to expose our youth to engineering, math and science fields. Would you please consider donating to LEAP Forward?

Your contribution will allow us to award book scholarships to college bound economically disadvantaged youth who are in dire need of support. Keep in mind that your contribution is 100% tax deductible.

Please help us to develop our next generation of engineers and scientists.

Does a \$500 Book Scholarship really matter? Now \$500 may

not seem like much, but for a student who is struggling to cover education costs, \$500 will seem like \$5000. You see, the average costs of an undergraduate book is about \$75-\$100 per class, so \$500 should cover the costs of books for one full-time student for a semester.

REMEMBER! As for your donation, it is 100% tax deductible and, for your efforts, you will receive a letter acknowledging your donation for tax purposes. LEAP Forward has historically granted an average of five Book Scholarships annually since 1998, but, in light of the rising number of students needing assistance, the goal of 10 total scholarships for 2007 is essential. We thank you so much for your generous support.

Peace and Blessings in 2007!

LEAP Forward, Inc. Accomplishments

LEAP Forward preserves the legacy of Mr. Wallace Leeper, a dedicated guidance counselor who really cared and nurtured disadvantaged underrepresented youth.

We continue his dream to help youth to rise to their full potential and to explore the extraordinary. Our accomplishments over the past years include the following:

- Conducted 9 college tours to such schools as Howard, Norfolk State,

Hampton, Tennessee State University, Fisk, University of Maryland, Meharry, Vanderbilt, and the University of Pennsylvania.

- Awarded over 40 Wallace Leeper Memorial Book Scholarships. College graduates have gone on to become teachers, engineers, and computer scientists. Others continue to pursue academic goals that will yield biology, education, and marketing careers.
- Presented math, science, and engineering career options and provided engineering literature to hundreds of students at career fairs, community events, job shadow days, college fairs, and other events.
- Served as student advocates for families where parents and/or grandparents were not knowledgeable about the college admissions process. Assisted youth with the preparation of financial aid

forms, college applications, college essays, and resumes.

- LEAP Forward was instrumental in bringing the Mathematics, Engineering, Science Achievement (MESA) program to Calvert County, Maryland.
- Youth exposure to engineering programs by participating in engineering camps and conferences sponsored by National Society of Black Engineers, Society of Women Engineers and the Engineering Awards conference.
- Recruited and facilitated students to participate in Minority Introduction to Engineering programs and to pursue engineering. (Efforts yielded three professional minority engineers and three current college students pursuing engineering.)

2006 Wallace Lorenzo Leeper Memorial Scholarship Recipients

LEAP Forward administers the Wallace Lorenzo Leeper Memorial Scholarship. This scholarship honors the memory of one of the most outstanding counselors who served at Calvert High School in Calvert County, MD. His dedication and devotion to young people framed many lives. He worked tirelessly to support students and provided an extremely personal touch to counseling. He really cared and it showed through his actions. We honor his memory with the following scholarship recipients.

Tashyra A. Jones
Calvert High School
Bowie State University
Nursing

“My dream since childhood has been to become a nurse. My goal now is to make that dream a reality.”

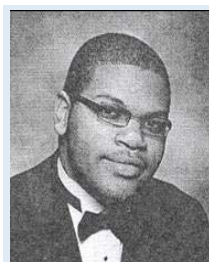

Terrance M. Hall-Sutton
Calvert High School
Delaware State University
Business or Pre-Law

“I would like to major in Business or Pre-Law and be the first person in my family to graduate from a college... and eventually pursue a successful career as a criminal defense attorney”.

Dominique Reid
School Without Walls
University of Maryland College Park
Architecture

“As a child, I always wanted to be an engineer but I never knew what discipline I wanted to go into. Over the years I have decided that becoming an architectural engineer would be the best decision.”

Shoron Waul
Calvert High School
University of Maryland Eastern Shore
Music Education

“I’ve always been reminded from my elders of my strong family heritage.” They have always known that going to college is a must.”

Nicole C. Greenfield
Calvert High School
College of Southern Maryland
Nursing

“I am the first from my family who will attend college and come out with a degree. It has been instilled in me from an early age; the importance of getting a good education.

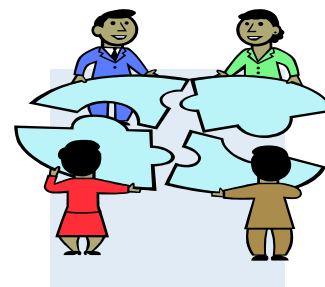

LEAP Forward’s Core Philosophy, “Enhance Your Life With An Early Start & A Perfect Finish”

LEAP Forward Participates In ASCE Workshop

LEAP Forward Board Member, Ms. Wilhemina Greene participated in a free workshop in Baltimore, MD sponsored by American Society of Civil Engineers (ASCE). The Joint Engineering Training Workshop entitled “You Can Do It, Too! Taking Engineering to the Kids” discussed ways to encourage and to increase the number of students entering engineering disciplines. As part of the workshop, she participated as a team on several ex-

periments – ways to build a bridge using only pennies and paper and ways to purify dirty water. These experiments fostered the notion that engineering can be fun as well as solve problems. Methods were discussed on how to engage young students [even 1st graders] to look at how their everyday life is centered around the various engineering disciplines. Participants left the workshop with experiments and demonstrations for every age group and the

knowledge and skills that WE can make a difference in our youth.

POINTS OF INTEREST & MESSAGE BOARD

Out & About - Board Member Vice-President Wilhemina Greene (and Rhonda Thomas (not pictured)) attended their alma mater TSU's Homecoming in Nashville, Tennessee. They each donated \$1000 to the TSU Engineering Endowment Fund. →

Blast From The Past! - Board Members Attending Their First National Society of Black Engineers Meeting in 1978, in Columbus, Ohio. (From Left - Rhonda Thomas & Burdette Wills.)

Shointa Wyquita Pumphrey - Shointa will graduate from the Nursing program at Hampton University in 2007. (To see her letter of thanks to LEAP Forward, go to page 5 of the LEAPERS Newsletter.)

CONGRATULATIONS! - To computer engineer Joanita Ayers! Joanita recently accepted employment with Northrop Grumman starting November, 2006. →

2006 Book Scholarship Letter Winner — *Dominique Reid*

As a child, I always wanted to be an engineer, but I never knew what discipline I wanted to go into. Over the years, I have decided that becoming an architectural engineer would be the best decision. I knew that I liked math and that I loved drawing, so what better way to fuse my two passions by becoming an architectural engineer. Education-wise, I always wanted to attend Tennessee State University in Nashville. My feeling about attending TSU increased after I attended their Fall 2004 Homecoming; this is when I first met Rhonda Thomas. Ms. Thomas' organization, LEAP Forward, Inc. sponsored the college tour to TSU and I am glad they did. Since my visit, I knew that I was going to attend college and that I would have the support I needed from LEAP Forward, Inc. to advance my educational career.

Since that college tour, Ms. Thomas has kept in touch with me, making sure that I was applying to colleges and just making sure that I was doing all right. She has been a backbone and I would like to thank her for the support, encouragement, and love. Also, I won the Wallace Leeper Lorenzo Memorial Scholarship in the amount of \$500, which will be used to purchase books in college.

Though I am not attending TSU, I will still pursue my engineering education at a local college - University of Maryland; College Park in the Fall of 2006 as an architecture major. I was

accepted into a five-year program that will allow me to receive my Bachelors Degree in the Spring of 2011. After that, I will attend school for another two years in order to receive my Masters in Architecture, but I do not know what school yet. I will finally graduate in 2013 and then I can open my own business.

In the year 2014, I will start work on trying to establish my own business that will be located in the Washington Metropolitan area. I will have graduated from the University of Maryland: College Park with honors in 2013. In 2016, my company, The Dasani Group will be celebrating its grand opening, the biggest event in the architectural community. The name of my company is Dasani, which stands for **Designed Architectural Structures and New Ideas**. My company will specialize in renovations, design, and preservation of historic buildings. My plan though tough can be accomplished, but it will take dedication and hard work to get it done. In order for the reward to be great, the work must be greater. I would not be able to do it without the help of my family and friends.

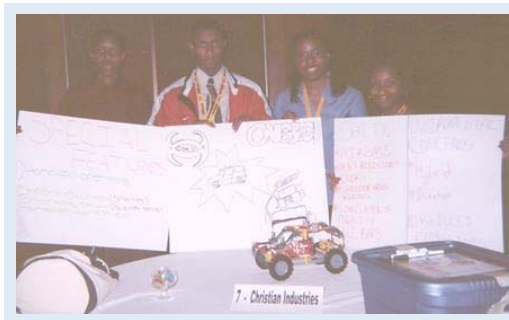

JONATHAN'S Thank You . . .

Dear Ms. Thomas,

I would like to thank your organization Launching Educational Assistance Programs Forward (LEAP Forward), Inc., for sponsoring my trip to the National Society of Black Engineers (NSBE) 30th Annual National Convention in Dallas, Texas. Without your financial support, I would not have been given the opportunity to participate in such a wonderful conference.

This conference provided me with the exposure to workshops that were both informational sharing and hands-on. The conference afforded me the opportunity to participate in the Ford Motor Company Car Competition to attend a motivational speaker's session as well

The above picture is the car that our team built 😊

as to develop marketing strategies for different products. Thanks, because I was able to meet some college students who are doing the things that I am trying to do, specifically Computer Graphics and 3D Animation.

The association at the conference with my

peers from different areas was positive and motivating. I also know that it is not too early to sign up for colleges and summer programs. I would love to go again next year.

Once again, I truly appreciate your generosity. Thanks, Ms. Thomas for all that you have done. You have no idea of the challenges that I face. You provided me with a vehicle to the future. In the picture, I am on the left.

Thanks,

Jonathan Littlejohn,
NSBE Jr. 3238 Member

Shointa's Letter . . .

Dear Ms. Thomas

How are you doing? I am doing well. If it weren't for you I probably wouldn't be in school. God has opened so many doors for me, and it has brought much happiness to my heart to know that people care about me the way they do. I want to thank you and the LEAP Foundation for hearing a desper-

ate and honest cry for help. The foundation has helped me since my freshman year at Hampton University, and this being my senior year, you took many burdens off my heart in your helping, especially with my finances. Not only do I appreciate your help, but also, my family because times have been hard from day one. However, through my prayers and family, God has

brought me through that "last second" of needing help. Thank you and I pray for many more years to come for the LEAP Foundation to help others that want the same opportunity.

Sincerely from a Hamptonian Woman,
Shionta Wyquita Pumphrey
May 2007 Nursing Graduate

LEAP Forward Participates In NSBE Engineering Camp 2006

LEAP Forward members traveled to Lynchburg, VA to allow 5 young men and women to participate in the 2006 National Society of Black Engineers (NSBE) Jr. Region II Summer Camping Conference held at Eagle Eyrie Baptist Conference Center. Students who participated were Byron Pullen, Marco Holmes, Brittany Neighbors, Alyssa Greene and Aaron Ogletree. LEAP Forward also sponsored Patricia Vest (a math teacher from a Baltimore Middle School), Jeffrey Ellis and Javon McPherson (Hart Middle School Washington, DC)

The Engineering Summer Camp is sponsored by NSBE and introduces youth to engineering and leadership principles. Youth interfaced and networked with other young people from the Washington DC, Maryland, and North Carolina areas. Several thought-provoking workshops were conducted and included 2 different design projects based on age group – Building a Hurricane Proof House [middle school students] and Building a Timing Device [high school students]. Students also attended informational workshops including the Try-Math-

Along, INROADS, College Admissions and NSBE Inventor workshops. The culmination of the camping conference was the competition judging and awards ceremony. Three students [Aaron Ogletree, Brittany Neighbors, and Marco Holmes] from our group took top prizes for their design projects and were awarded gift certificates. All students were given a NSBE T-shirt and a backpack for participating.

National Black MBA Conference Report

National Black MBA Conference Report
Rhonda Thomas, LEAP Forward, Inc.

I would like to first acknowledge the DC chapter, and its members Shomari McCrimons (Business and Economic Development Chair), Angela Dixon-Van Croft (President), Cedric Mobley, and Oscar Mardis. I am very grateful to be selected to participate in the Community Consulting Clinic (CCC) and for the opportunity to attend the National Black MBA conference in Atlanta, Georgia, on September 27th through October 1st, 2006 (at the financial expense of the DC Chapter!).

The CCC provides consulting services to current or aspiring entrepreneurs whose level of financial resources makes it difficult to solicit professional business advice. My participation in the CCC began in 2005. During that period, I was privileged to be under the mentorship of Lauren Beard who provided LEAP Forward strategic planning assistance.

The conference theme was "Winning with Intention, Winning with Innovation, and Winning with Integrity". This theme was so appropriate. It sums up my conference experience in that I was made to feel like a winner and inspired to stay the course to keep on winning.

Though I have attended professional conferences before, there was something different about this one. Clearly, this is a financially sound organization and the quality of the workshops, speakers, and entertainment were indicative of that fact. Scheduled events fostered a spirit of empowerment and I took advantage of

the opportunity to participate fully in conference activities offered.

All in attendance were all about business and eager to learn and grow. Meeting the DC Chapter Leaders of Tomorrow and learning of their dreams and aspirations also gave me a greater sense of pride for personal reasons. (Academic enrichment and personal achievement are two key areas in LEAP Forward's mission.) Copies of the LEAP Forward poem were provided to the students!

I was also impressed with the accessibility to executives of major corporations and organizations. Who would have thought that I could walk into a session (uninvited) and meet the head of a foundation that provides over 50 million dollars a year to charities! (The President of the Verizon Foundation!)

Two central themes resonate within me since attending the conference: following your passion and reaching back to help others. During many of the sessions, I was reminded of the importance of following my passion. One of the speakers stated that your passion should make you skip out of bed, not roll out of bed! So, if that is the measuring stick, then I'm on the right path. Sessions like the Women Business Owners workshop really inspired and

encouraged me to continue my business pursuits and not give up on my dream of making LEAP Forward, a world-class nonprofit organization that produces hundreds of minorities for the technological pipeline. After hearing the stories shared, I believe that if they can succeed in spite of obstacles, I can too. It was comforting to know that challenges don't have to equate to failure. I must learn to view and handle obstacles differently. Everything that happens is really a teaching opportunity.

From Left -Rhonda Thomas, Oscar Mardis (President-Elect) & Angela Dixon-Vancroft (President)

The second theme, interestingly enough, was our role in reaching back to help others. It was discussed during both plenary sessions (Diversity and Legacy of Maynard Jackson). Assisting youth is the primary purpose for LEAP Forward, and it was so reassuring to hear many speakers stress the importance of making a difference in our communities.

The career/exhibit fair was impressive. Though under tremendous time constraints, I distributed 20 marketing packages to several corporate representatives.

Follow up efforts are already in the works to secure needed funding for LEAP Forward's programs.

Wish us well...

Alyssa Greene's Camp Experience

NBSE Camp Experience
by Alyssa Greene

NSBE was a great away from home camp experience for me. I learned a lot because we did many workshops that dealt with

college and other engineering skills. Besides the workshops, I met a lot of new friends and had a great deal of fun. We had parties, dances and movies. We also did 2 inventions. NSBE

challenges you and the only thing I could want was for it to have been longer.

Continued From Page 4 (POINTS OF INTEREST & MESSAGE BOARD)

First Job! - LEAP Forward assisted engineering graduate, Joanita Ayers in her job hunt. The organization provided resume assistance and distributed her resume to LEAP Forward's employer network. The following is an excerpt from correspondence between Joanita and LEAP Forward on 10/18/06;

"I got the call yesterday. They extended me an offer. My first day is Nov. 6. I'll be working out of the Indian Head Office and traveling to Alexandria to the test site. I am so excited. My title is Engineer I. Thank you so much. God was waiting for the right one for me!"

LEAPERS Newsletter - - First Issue Released!

Thank you, Deborah Hemphill for the Newsletter layout and design! We appreciate your kindness and dedication.

Thank You! - Thank you, Chevrolet! Your donations of the 2006-2007 Guide to Historical Black Colleges and Universities Books were received to support 2006-2007 college presentations. Thank you Mel and Vicki, for your support!

New Board Members! - LEAP Forward welcomes new Board Members Russell Yates, CPA and Lauren Beard, President Valens Marketing and Consulting Group, LLC.

LEAP Forward Is Interviewing New Board Members! - We are requesting your assistance in our search for persons to fill senior level leadership positions within this organization. Your participation with LEAP Forward will allow the applicant to guide and participate in programs that have Metropolitan Washington influence, and have an impact on efforts to improve educational and career opportunities for middle and high school youth. This is an opportunity to serve with other dynamic board members to influence the lives, careers, and educational development of our youth. If you are interested, please call Rhonda Thomas at 301.509.3872 to discuss this opportunity further.

Help us encourage youth to LEAP Forward on their way to building great lives.

LEAP Forward Inc. Founder And President *Rhonda Thomas*

In high school, Rhonda Thomas dreamed of pursuing English as a major in college and becoming a teacher. If it were not for the diligence of her guidance counselor, the late Mr. Wallace Leeper, who recognized her mathematical aptitude, the engineering world would never have been able to reap the rewards of her career as a project engineer.

Rhonda Thomas, a 30-year employee of the United States Government, began her career as a participant in an engineering cooperative education program for the Department of the Navy. As a Tennessee State University graduate, her collegiate education was offset by actual hands on experience at the Navy's testing facilities in Southern Maryland. This program provided the much-needed financial resources that allowed her to reach her educational goals. Upon graduation, Rhonda conducted and managed major defense systems test and evaluation programs. Her career advanced rapidly as she took

advantage of numerous accelerated and executive training opportunities. She is a certified PMI project management professional and currently serves as a project engineer for numerous aviation research and development initiatives at the Federal Aviation Administration in Washington, DC.

As a community conscious citizen, Rhonda led many efforts to encourage youth to become their best. So, in 2001, she founded a 501 (c) 3 nonprofit organization entitled, **LEAP Forward**. Her corporation focuses on developing and exposing different math and science career

"Service to others makes life worthwhile" Rhonda Thomas

options to disadvantaged youth as well as providing educational opportunities such as college and industry tours, scholarships, and engineering seminars. (www.leapforwardinc.org)

Rhonda holds memberships with the TSU Alumni Association, National Society of Black Engineers, Society of Women Engineers, Eta Kappa Nu Honor Society, National Association for the Advancement of Colored People, and Delta Sigma Theta Sorority, Inc.

Rhonda earned a B.S. degree in Electrical Engineering from TSU, a M.S. degree in Systems Management from the University of Southern California, and later a M.S. degree in Systems Engineering from the University of Pennsylvania. In 2005, she earned a certificate of completion in Entrepreneurship Studies at Southeastern University, Washington, DC.

Rhonda truly believes that you haven't really lived in your purpose until you learn how to give of yourself to help others. She counts herself blessed and is thankful and grateful for her journey.

Who Is LEAP Forward Inc.?

Organized officially in 2001, LEAP Forward seeks to;

- Expose youth to math and science careers with an emphasis on engineering;
- Provide educational financial assistance to economically disadvantaged youth through scholarships;
- Expose youth to technical careers options through seminars and industry tours;
- Introduce college life through college visits and tours;
- Advocate and assist in preparing necessary documentation to pursue post secondary education or vocational training.

OUR MISSION

“We believe in serving minority youth from underrepresented ethnic backgrounds. Through personal mentoring and providing them with social and cultural enrichment activities to include (but not limited to) informational seminars, field trips and educational support services that foster positive self-esteem, academic excellence and a comprehensive awareness of technical career options.”

OUR CORE VALUES

Our Core Values: Excellence, Dedication, and Commitment. We believe:

Excellence should be displayed in all we do and that all youth can achieve excellence when given an opportunity to learn and grow.

Dedication to our youth is necessary to meet their needs.

Commitment embraces commitment and as we make deposits in the lives of youth they will commit to society.

OUR VISION

“We believe in developing a generation of minority youth that will accept the challenge to become academically prepared, enter math and science-based careers and become the problem solvers and productive leaders that will address the needs of all humanity.”

“PROVIDING HOPE & OPPORTUNITY”

Launching Educational Assistance Programs Forward, Inc. (LEAP Forward, Inc.) is a 501 (c) 3 nonprofit organization established to provide hope and opportunity with excellence, dedication and commitment to youth.

What Can You Do To Help?

You can make a difference in the lives of our youth. Help One, Reach One!

With Your Donation - -

- You can offer options.
- You can offer help.
- You can offer hope.

Help us to increase the availability of positive activities for youth by providing funding to help solve critical needs. **Donations are 100% tax deductible.** *Help us to encourage youth to LEAP Forward to great things ahead and to become all they can be.*

Help us to increase the availability of positive activities for youth by providing educational and promotional materials that can be shared with youth.

To make a donation, please navigate to our webpage at www.leapforwardinc.org and select the link entitled “Donations”. Here, you can download a donation form. Donation Form is also attached for your convenience!
